

Bridge Repair To Impact Access to the York County Resource Recovery Center

Beginning mid to late March 2018, Manchester Township will be replacing the Toronita Street bridge located between Round the Clock Diner and the York City Wastewater Treatment Plant. The project is anticipated to be completed in June 2018. During construction, access to the York County Resource Recovery Center (RRC) via Route 30 to Blackbridge Road will be restricted. We wanted to make you and your residents aware of this situation. Manchester Township has not yet identified a specific start date in March, but once the Authority is informed of one, we will pass it on to you. Alternative routes to the RRC include, but are not limited to the following:

From I-83 South: Take Exit 24 (Emigsville). You will proceed on the off ramp to a traffic signal light. At the signal light, turn **left** onto Church Road. Take Church Road to the traffic signal light at the intersection of Church Road and North George Street and make a **right** onto North George Street. Proceed on North George Street until you come to the traffic signal light at North George Street and Aberdeen Road. Make a **left** onto Aberdeen Road and proceed to the stop sign at the intersection of Aberdeen Road and Sinking Springs Lane. Make a **right** onto Sinking Springs Lane and proceed to the stop sign at the intersection of Sinking Springs Lane and Locust Lane.

Proceed **straight** (Sinking Springs Ln. turns into E. Locust Ln. which turns into Grim Ln.) to the four-way stop at the intersection of Grim Lane and Woodland View Drive. At the four-way stop, proceed **straight** on Blackbridge Road for approximately ½ mile to the first gate entrance to the RRC. Make a **right** into the Resource Recovery Center and bear right toward the scales.

From I-83 North: Take Exit 22 (North George Street). Proceed on North George Street to Aberdeen Road and make a **right** onto Aberdeen Road. Proceed to the stop sign at the intersection of Aberdeen Road and Sinking Springs Lane. Make a **right** onto Sinking Springs Lane and proceed to the stop sign at the intersection of Sinking Springs Lane and Locust Lane. Proceed **straight** (Sinking Springs Ln. turns into E. Locust Ln. which turns into Grim Ln.) to the four-way stop at the intersection of Grim Lane and Woodland View Drive.

At the four-way stop, proceed **straight** on Blackbridge Road for approximately ½ mile to the first gate entrance to the RRC. Make a **right** into the Resource Recovery Center and bear right toward the scales.

From Route 30: Follow the directions above from North George Street.
