

York County Solid Waste Authority

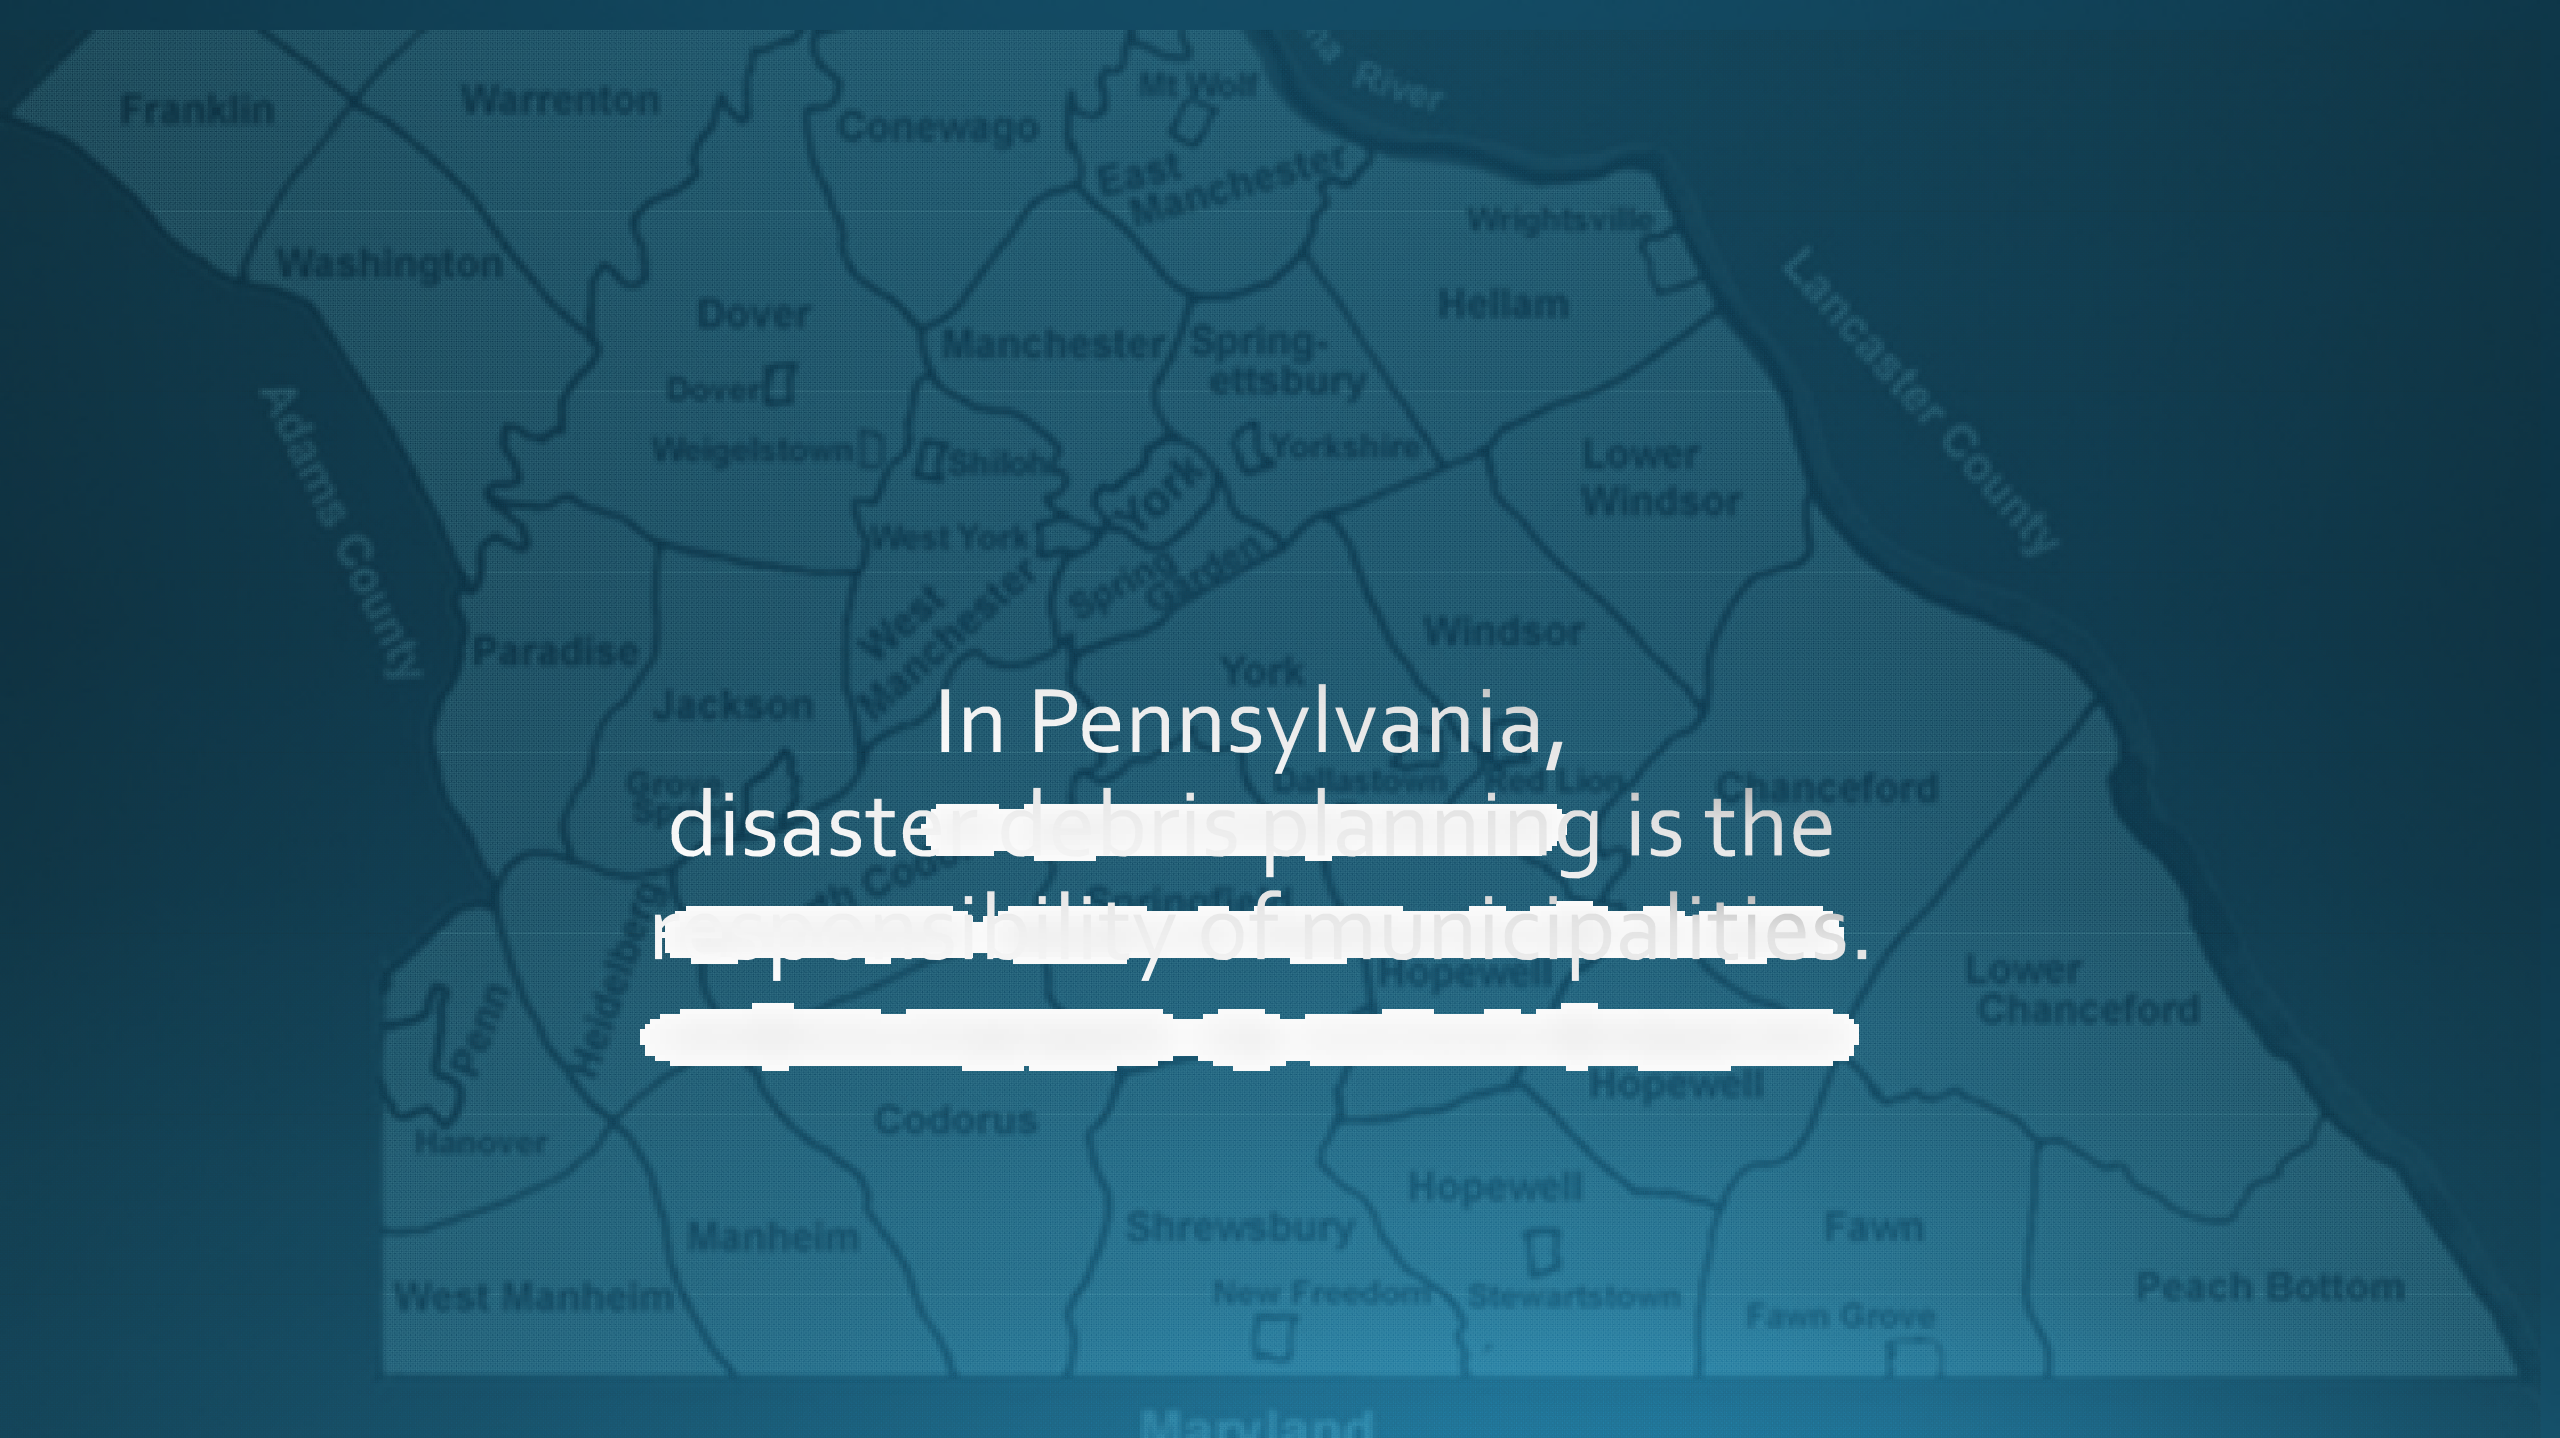

Disaster Debris Management

Terry Beck

Technical Program Specialist

Fall Municipal Recycling Coordinator Meeting

November 13th, 2024

A map of Lancaster County, Pennsylvania, with various municipalities labeled. The map is overlaid with a semi-transparent dark blue layer. The text "In Pennsylvania, disaster debris planning is the responsibility of municipalities." is centered over the map. Below the text is a thick white horizontal bar.

In Pennsylvania,
disaster debris planning is the
responsibility of municipalities.

Disaster Debris Management

Municipalities should locate and secure disaster debris management sites prior to the occurrence of a disaster debris-generating event.

Secure and maintain pre-disaster debris management contracts with waste/recycling haulers, equipment, suppliers, etc. prior to the occurrence of a disaster debris-generating event.

Information should then be compiled into a formal plan.

Disaster Debris Management

Primary Agency:

York County Municipalities

Support Agency:

York County Solid Waste Authority (YCSWA)

York County Office of Emergency
Management (YCOEM)

Pennsylvania Emergency Management
Agency (PEMA)

Pennsylvania Department of Environmental
Protection (DEP)

US Environmental Protection Agency (EPA)

Federal Emergency Management Agency
(FEMA)

Disaster Debris Management

Every Fall, the YCOEM sends out the YC Disaster Debris Management Framework.

This document details municipal and county disaster debris management responsibilities

York County Disaster Debris Management Framework

October 1, 2022

Disaster Debris Management

YCOEM also provides a copy of the "York County Disaster Debris Management Contact List"

Excel Document with 15 pages of local equipment, hauling, recycling/salvage and waste management company contacts

This is updated every Fall by YCSWA.

Companies w/Dump Trucks Registered to Haul Waste in York County	Address	City	State	Zip Code	Phone Number	Website	Contact	Number of Dump Trucks	YCSWA License #

Disaster Debris Management

Link to the US EPA's "All Hazards Waste Management Planning Tool"

Assists emergency managers and planners in the public and private sectors in creating or updating a comprehensive plan for managing materials and wastes generated from manmade and natural disasters.

This tool assists emergency managers and planners in the public and private sectors in creating or updating a comprehensive plan for managing materials and wastes generated from manmade and natural disasters. The tool walks the user through the process of developing and implementing a plan. The tool also contains many resources that can be used as aids to various aspects of the planning process.

 **Log In**

Log in to create a waste management plan or modify an existing plan

 **Request Access**

Submit a request to gain access to the tool

Request

This tool emphasizes the need for planning for waste management before an incident occurs. It is intended to encourage communities to begin planning now to help ensure their compliance with applicable waste management related regulations during incidents. Please note that this tool does not establish any requirements, create any right or benefit, provide any relief from applicable regulations, or create any flexibility that is not currently allowed by law. This tool is not a regulation. It does not change or substitute for any legal requirement. This tool is not a rule, is not legally enforceable, and does not confer legal rights or impose legal requirements upon any member of the public, states, or any other federal agency. Consult applicable federal, state, local, tribal, and territorial requirements.

Disaster Debris Management
